COSSIGA

Making food look great globally

Hi there,

Welcome to our Greenbook 2024, packed with fresh inspiration!

We're always excited to release a new Greenbook, but this year is particularly special as it's happening alongside the launch of our brand new website: [cossiga.com](https://www.cossiga.com)

Designed with your needs top of mind, it is easy to use and offers dynamic new features, which we think you'll really enjoy. **Even better, all products featured here have QR codes for quick and easy integration with our website - give it a go!**

Onto product news and our recently launched **DTG MULTIDECKS** have been extremely popular! Head to page 8 to find out more about these cabinets that offer high volume and efficiency in one stylish unit. And don't miss our hot newcomer for this year, the **LSCK Counter Kit** that can also transform into a mobile trolley. Easy to specify, easy to sell and easy to install! (Page 38).

Read on for inspiration, information and how we can help you make food look great - anytime, anywhere! That's our ethos. Enjoy!

We are here to make it easy and help your business thrive!
In a nutshell, here is how we roll:

Expert 360° service

We are experts in food cabinets that make food look great and our experienced team can offer valuable insights into the business of displaying and selling food across a range of environments. We offer unmatched 360° service, from product selection right through to after-sales support and servicing, ensuring an easy and stress-free experience.

Think global, act local

Our approach is glocal, combining the benefits of an efficient global operation with the expertise of trusted local support teams that have an in-depth understanding of their market. Our headquarters in Melbourne features a customer-centred showroom that has been designed specifically for you to visualise layouts, discuss concepts and ideas and test working food displays. Drop in and ask our friendly team for some expert advice!

OUR PLANT

STOCK

We design and manufacture!

All Cossiga products are designed in-house and made in our own smart manufacturing plant in Foshan, China, where quality control is paramount. We use the 5S lean manufacturing approach to minimise waste and optimise productivity. This gives us full control of our value chain and enables us to offer rock-solid distribution and technical product support.

Always ready to go!

We manufacture in batches and dispatch to our local warehouses around the world to ensure a constant and timely supply for our customers. We can also work with you on project-specific runs that are customised to suit your needs.

Being Sustainable

As we continue our sustainability journey we are more committed than ever to reducing our environmental impact. We are working with external advisors to develop a comprehensive sustainability strategy that is measurable and results-driven.

We are getting greener!
We believe Sustainability is essential and we're excited to be on a journey to evolve our business for a regenerative future.

Making food look great = better returns!

PREVENTATIVE MAINTENANCE:

**Save energy, protect your asset
and keep your warranty.**

Following our cleaning and maintenance guidelines will ensure
uninterrupted and long lasting performance of your Cossiga cabinet,
as well as reducing the energy consumption of your food display.
Lack of maintenance could void your warranty cover so contact our
service team who can provide any assistance required, along with
scheduling preventative maintenance for your Cossiga products.

Contact us to discuss a preventative maintenance programme
Reach out on 1300 099 215 or **email:** service.au@cossiga.com

KEEP IT
CLEAN

SAVE
POWER

Working to get

Greener!

As part of our sustainability strategy, we already have positive initiatives underway. Here are a few:

R290 GAS

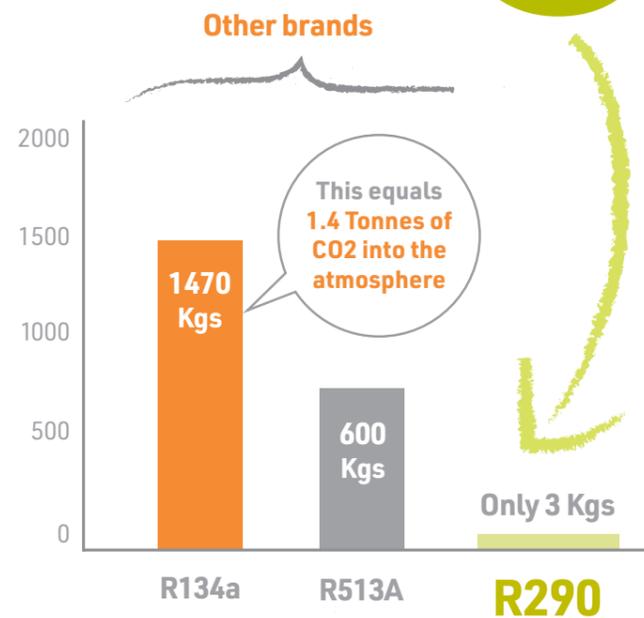

All of our refrigerated products use R290 non-toxic propane gas - a naturally occurring organic compound of hydrogen and carbon, with minimal impact on the environment.

Due to its thermodynamic properties and low condensing temperature, R290 can deliver up to 50% in energy savings when combined with other energy saving factors like ENERGY STAR® certification.

All greenhouse gases have a Global Warming Potential (GWP), which refers to the total contribution to global warming from the emission of one unit of gas. Compared to R134a or R513A which are currently used as standard refrigerants, R290 has an incredibly low GWP of only 3!

R290
GREEN ENERGY

Let's compare:

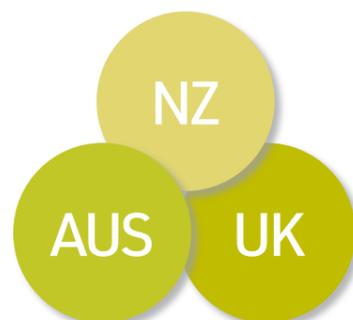

SUSTANABLE PACKAGING:

All our cabinets are packed in 100% recyclable cardboard. Research is well underway into starch-based protective packaging for our cabinets, eliminating the need for any plastics. Watch this space!

SMART SHIPPING:

We wrote an algorithm to eliminate the need for air freight. All freight is now by sea or road. We have local warehouses to service local markets, reducing wasteful, costly and time consuming freight scenarios.

And when we say we are making food look great... we actually mean it!
